Our Story

SchoolVue has been developed in partnership with UK schools. Many of the features and ideas have come from the senior leaders and classroom teachers who use it.

Our Vision

Is to provide an online tool that genuinely helps a school to provide excellent provision and support for its students. Interpreting and sharing information is key to driving performance.

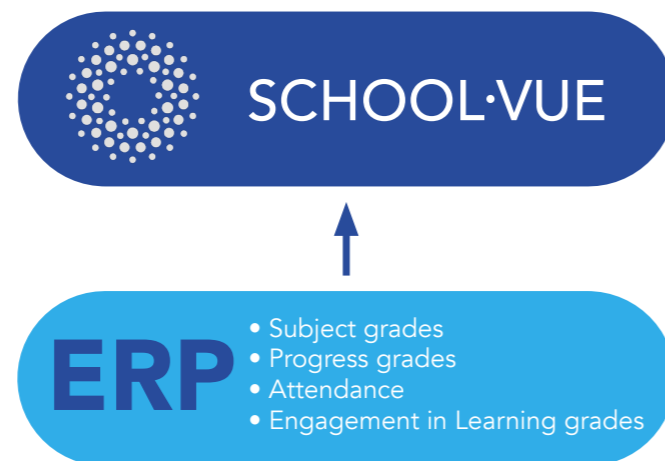

Technology

Available online 24/7 from any internet enabled device. Hosted in Microsoft Azure to ensure your data security.

Why SchoolVue?

- A powerful easy to use data analytics tool
- Available 24/7 from any internet-enabled device anywhere
- A tool for all education phases
- Analyse multiple data series
- Compare a wide range of student information from your own ERP system
- Analyse school performance across a large number of schools
- Instantly see the students behind the data

What does it do?

Easy to use online dashboards and tools allow your members of staff to quickly find the information they are looking for.

Schools can customise SchoolVue to analyse and represent a wide range of student information being collected in their ERP system.

Many schools collect engagement in learning grades such as effort, behaviour, classwork etc. This information will be analysed and displayed alongside performance grades and attendance to present an accurate picture of how a student is performing over time.

The class view and seating plan tool allow teachers to view this information and identify appropriate support for the right pupils. Subject and school wide actions for pupils can be recorded and made highly visible throughout SchoolVue.

A powerful analytics tool

SchoolVue is designed for:

- Education Network leaders
- School Leaders
- Curriculum Leaders
- Pastoral Leaders
- Classroom teachers
- Data managers

The online dashboards focus on four key areas:

- Multiple schools performance
- Individual school performance
- Subject performance
- Student performance

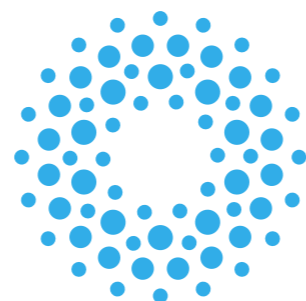

SchoolVue is a very student focused in-depth analytics tool. It's very easy to see the students behind the data.

Click on a number in a table

Click on a coloured bar in a chart

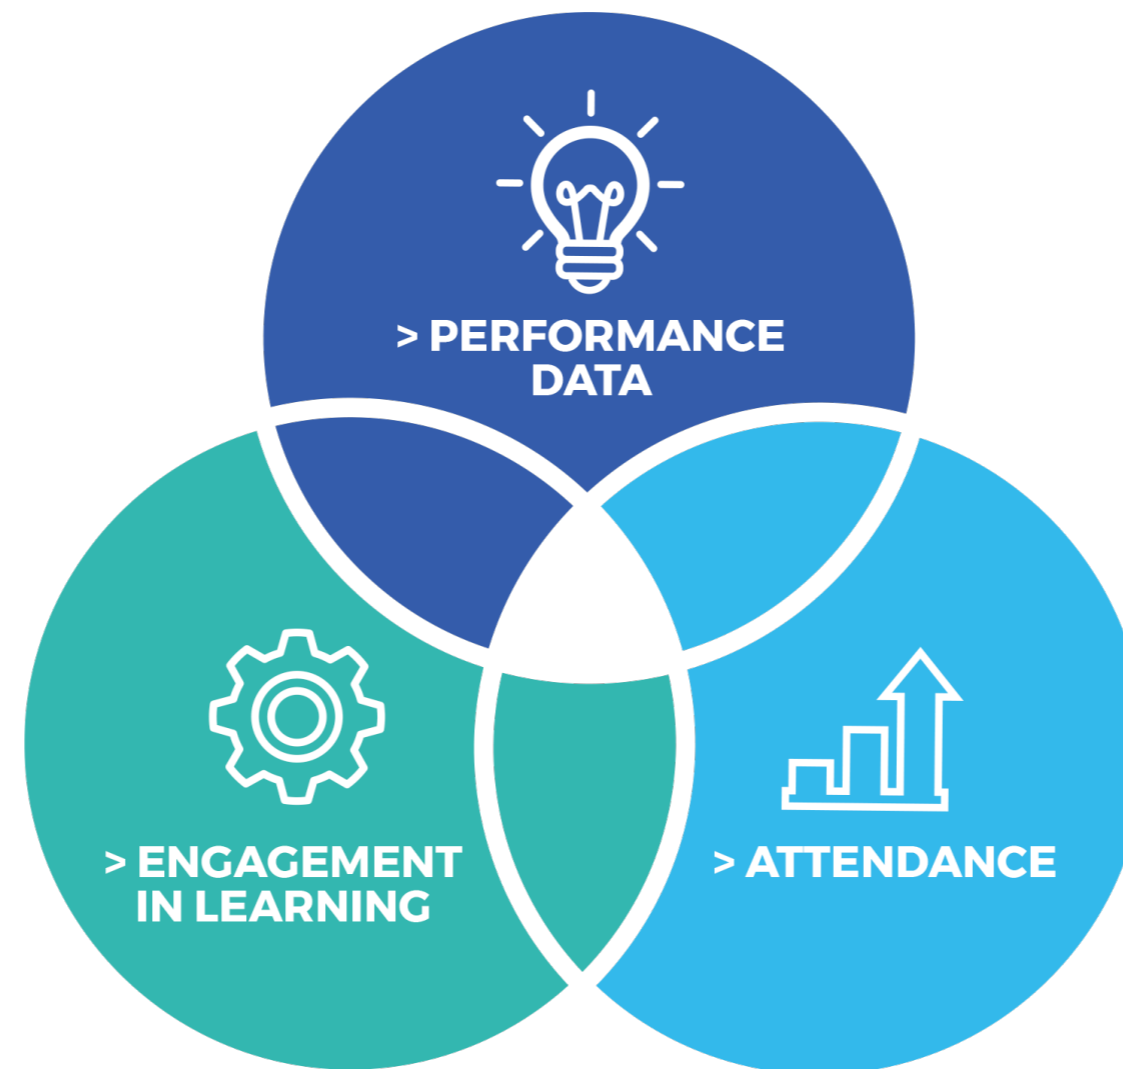

Highlight points on a scatter diagram

See the students behind the data

Understanding the performance of a student is not always straight forward. This is why many schools collect EiL information such as effort, behaviour, classwork etc. Identifying barriers to learning is key to meaningful interventions.

Perform in-depth analysis of EiL data alongside subject performance data to gain greater insight into your students. Use this information to put in place student strategies and interventions. A school can collect up to four customisable EiL grades. They can be subject specific or whole school. SchoolVue can present and analyse data such as category mappings, numbers, averages or percentages.

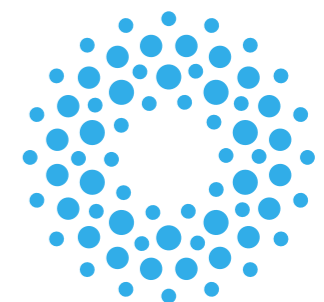

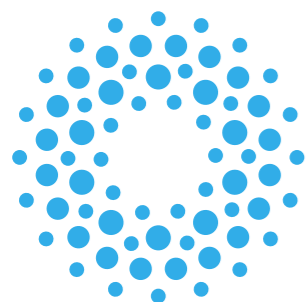

Many schools develop their own assessment models and progress rationales. The simple administration tools in SchoolVue allow schools to define their own progress / performance categories and grade structures.

For each school phase, compare EiL information alongside subject grades to identify trends.

Analyse performance trends across a range of schools within a group and identify areas for support.

Instantly see the students behind the data with a single click. Record and review student actions.

Whole School

Use the interactive functions to explore:

- o Performance over time (up to four data series)
- o Cohort context
- o Performance of key groups
- o Progress vs attendance and EIL grades
- o Subject attainment and progress overviews

Analyse performance by key groups to ensure the progress of all students.

SchoolVue is unique in its ability to compare and analyse multiple data series (up to five) to explore trends.

Subjects

Provides in-depth insight for effective management

- o Discuss progress over time (up to four data series)
- o Explore performance of individual classes and key groups
- o Quality assure setting in terms of prior attainment bands
- o Identify underperforming students using the transition matrices
Just click on the numbers to see who they are
- o Analyse the impact of Engagement in Learning

Explore the context and performance of key groups within a specific class.

- o View school actions in place for students
- o Use the information to make decisions regarding support and record these actions for individual students

Students

Collate all information on students in an easy to view way for an entire cohort, selected group or individual.

- o View overall and individual subject performance for a student
- o Record school and class actions for students and monitor impact over time
- o Set up specific intervention groups and evaluate impact
- o Compare multiple data series

Network of Schools

View your network of schools as one organisation. Analyse student and subject performance.

Monitor:

- o Individual school performance compared to the group
- o Subject performance within the group
- o Performance of key student groups

SchoolVue is the easiest to use online flexible data analytics tool for schools. Allowing you to present a variety of student information in a clear, accurate and effective way on a day to day basis will drive school performance.

Available 24/7 from any internet-enabled device anywhere, you will find easy to use online tools and reports to understand and informatively use student information being collected. This leads to better strategic decisions at school, classroom and individual student level.
